## **Kent Dual Drive Tandem Comfort Bike Features**

Kent Dual Drive Tandem Comfort Bike - There may not be as many options when it comes to tandem bikes as there are with regular bikes, but there are still some things to consider. Here are just a few of the features that make the Kent Dual Drive Tandem Comfort Bike an excellent choice in tandem bikes:

The seats are at 29 inches in the front and 20 in the rear. So the second seat could be used by either a small adult or a child while an adult sits up front and steers. The seats are gel filled so they are actually quite comfortable. They don't hurt like a regular bike seat. Each rider also gets a holder for a water bottle. This bike is made for a nice day of touring around.

It has extra wide tires for good traction, the brakes are on the front handlebars and it has a 21 speed drive train. It's solidly built, nice looking and made to last.
