# Trail-Gator Child Bike Tow Bar

## **Trail-Gator Child Bike Tow Bar Review**

Use this Challenge Trailgator tow bar to take all the family on bike rides. The youngest members of your family can take their own bike, securely attached to the back of yours. Easily attach or detach bikes to let them ride on their own or tow them when they get tired. Brilliant peace of mind for parents.

Trail-Gator Bicycle Tow Bars convert any ordinary child's bike into a safe, tow-able trailer bike, whenever desired. To ride attached, simply unclip the Trail-Gator Child Bike Tow Bar from the stored position on the adult bike, extend it, and connect it to the receiver, which is mounted on the child's bike.

When the child's bike is connected, the front wheel is lifted off the ground and a stabilizing bar prevents the handlebars from turning, leaving the adult in control of steering. Children can choose to coast or pedal while they are being towed, making the ride much easier for them.
