# WeeRide Co-Pilot Bike Trailer

## WeeRide Co-Pilot Bike Trailer Review

Train a child how to ride a bike without dealing with training wheels with the **WeeRide Co-Pilot bike trailer**. The Co-Pilot--which attaches quickly and easily to almost any bicycle with a seat post--is just like a regular bike, with handlebars, a seat, and pedals for your youngster. Your child feels like they are riding a bike and get to experience how to balance and pedal, but you have control of the actual ride, including speed, balancing, braking, and steering. It's a great way to teach basic biking skills and safety without giving up control before he or she is ready.

## WeeRide CoPilot Product Video

This weeride co-pilot bike trailer is equipped with a true quick-release system for quick detachment from the adult bike, along with adjustable handlebars that accommodate children of different heights. In addition, the seat is more comfortable and better built than typical bike trailer seats, so your child will want to keep riding throughout the day.

Once you arrive at your destination, the arms fold up easily for compact storage. Other features include an attractive black and silver color scheme, a safety flag and handlebar pad, and a 20-inch wheel size. The Co-Pilot--which holds up to 75 pounds--weighs 24 pounds by itself and is recommended for ages 4 to 9.

The WeeRide Co-Pilot bike trailer is just the thing for a child who wants to tag along with Mommy or Daddy, but doesn't have the legs for it! Your child can pedal to help you along, or just coast and enjoy the scenery. This bike trailer is sturdy and just like a regular 20" bicycle with regular handlebars, seat, and pedals.

The Co-Pilot bike trailer also comes with a safety flag to alert motorists. The WeeRide Co-Pilot is great for the whole family.... nothing says togetherness like a family bike ride !
